Get your Registration Button .....	5
Insert The Code .....	6
Insert a 2nd Button.....	6
Test the page .....	7

## Introduction

Perhaps you want to customize your registration page more than our program allows. Sometimes you want the page on your site. This will help you do both.

## Choose Custom Design

On your registration page you will want to select the last option for choosing a design for your webinar registration page which is "Your Own Custom Design"

Load the template

## Add The Registration Page Link

 Fill out your webinar registration page (your own custom design)

Your website url

Registration box fields

These are the fields your users will need to fill in to register to your webinar.

- Name
- Email
- Phone

---

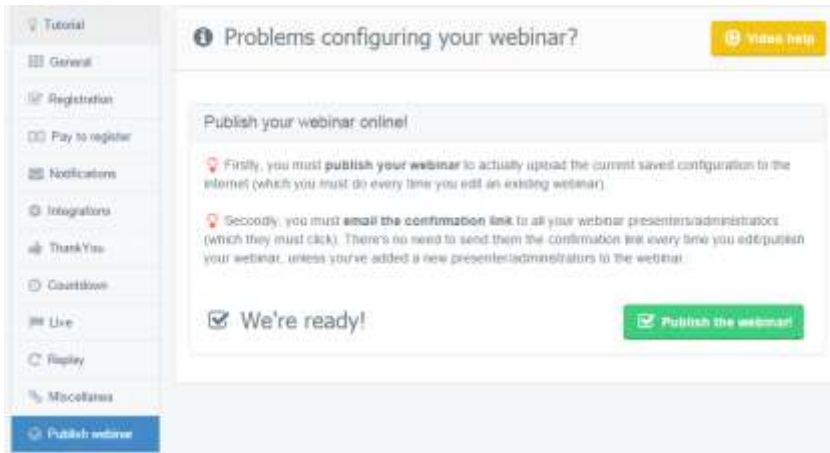

Done with the configuration?

You'll want to enter the URL for the page you are going to use for Webinar Registrations.

Save the Module

You can preview at this point, but it will not have the registration button yet.

## Publish Your Webinar

## Get your Registration Button

WebinarJam Review

- » **Webinar registration link**  
Give this link to your users so they can register to the webinar  
`http://webinarjam.net/webinar/go/12501/def4bf5d4`
- » **Webinar administrator and/or presenter link**  
Webinar administrators and presenters use this link to log into the room control panel. Each admin/presenter must use his own unique login link.  
SUPER ADMIN: MJ  
`http://webinarjam.net/webinar/go/superadmin/g2zdkubr/mrsw2zrAmjtdkzt`  
[Email login links to admins](#)
- » **Embed registration button in your own site**  
Simply copy/paste this code into your website HTML wherever you want the registration button to be displayed  
`<div class="embedded-joinwebinar-button"><a href="#" target="_parent" |`

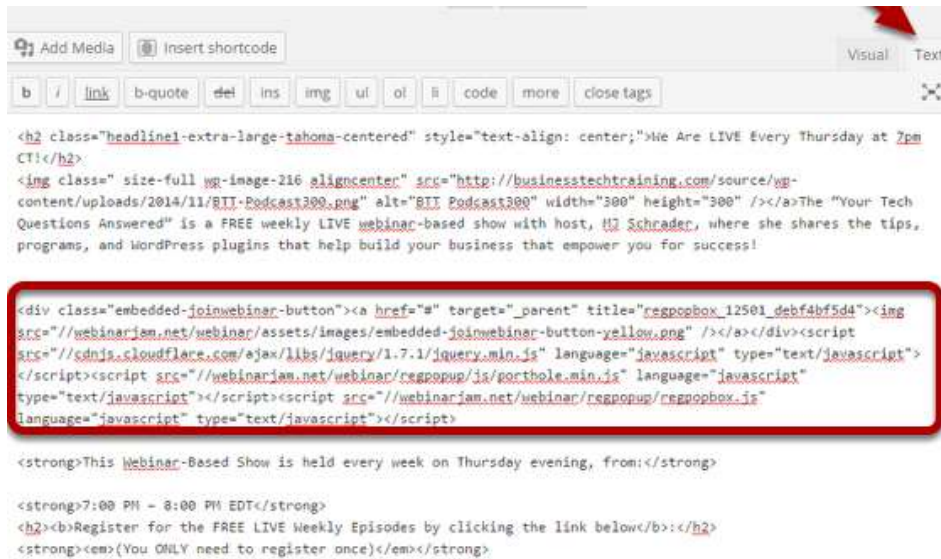

Go to your Dashboard and select Get Links.

On the page you want "Embed registration button in your own site" however the instructions assume you only want the link on one place on your page.

You will need to copy all the code in this box.

**NOTE: THIS CODE IS ONLY FOR ONE BUTTON**

## Insert The Code

```

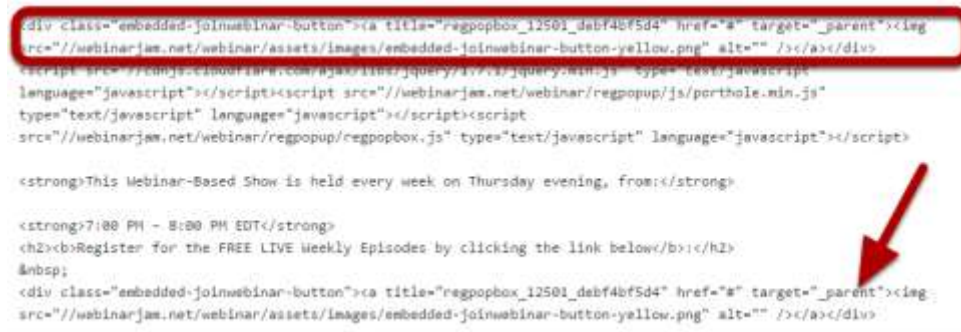

Add Media Insert shortcode Visual Text
b i link b-quote del ins img ul ol li code more close tags
<h2 class="headline1-extra-large-tahoma-centered" style="text-align: center;">We Are LIVE Every Thursday at 7pm
CT!</h2>
<a>The "Your Tech
Questions Answered" is a FREE weekly LIVE webinar-based show with host, Hil Schrader, where she shares the tips,
programs, and WordPress plugins that help build your business that empower you for success!
</a>
<div class="embedded-joinwebinar-button"><a href="#" target="_parent" title="regpopbox_12501_debf4bf5d4"></a></div><script
src="//cdnjs.cloudflare.com/ajax/libs/jquery/1.7.1/jquery.min.js" language="javascript" type="text/javascript">
</script><script src="//webinarjam.net/webinar/regpopup/js/porthole.min.js" language="javascript"
type="text/javascript"></script><script src="//webinarjam.net/webinar/regpopup/regpopbox.js"
language="javascript" type="text/javascript"></script>
</div>
<strong>This Webinar-Based Show is held every week on Thursday evening, from:</strong>
<strong>7:00 PM - 8:00 PM EDT</strong>
<h2><b>Register for the FREE LIVE Weekly Episodes by clicking the link below</b></h2>
<strong><em>(You ONLY need to register once)</em></strong>

```

Go to the registration page on your site. If you are using WordPress you will want to select Text so you can insert it as HTML code. No matter what program you use for your website you need to be able to insert this code as HTML.

## Insert a 2nd Button

So for the rest of the places you'd like for a button to appear, you can insert this part of the code (specific to your webinar)

```

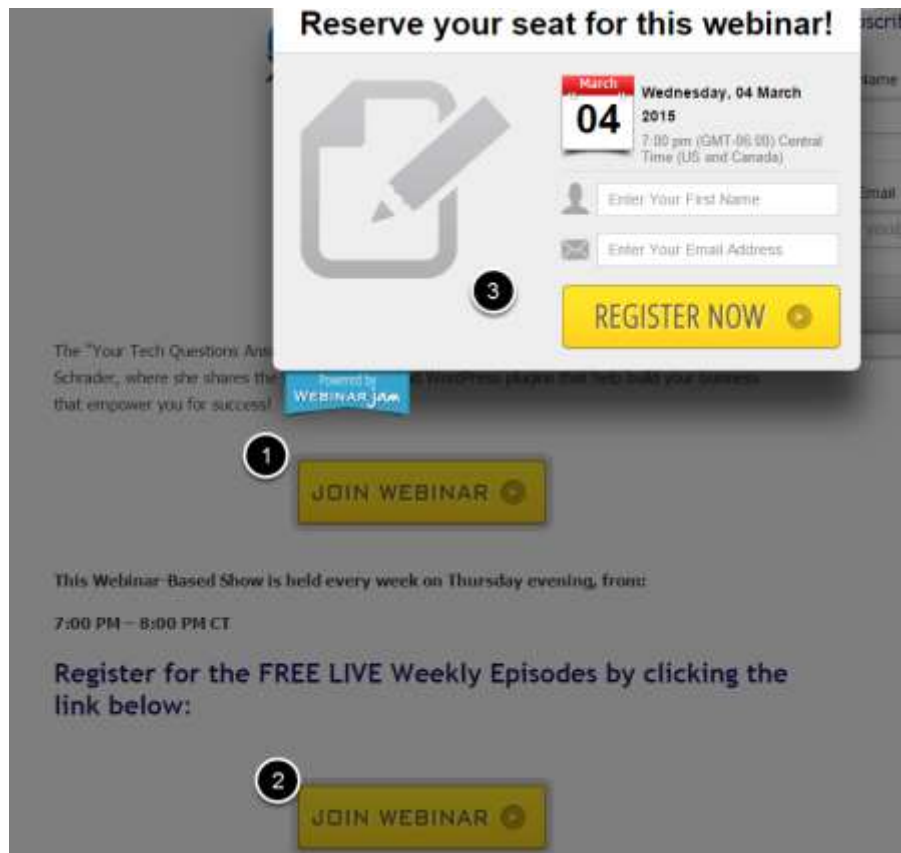

<div class="embedded-joinwebinar-button"><a title="regpopbox_12501_debf4bf5d4" href="#" target="_parent"></a></div>
<script src="//cdnjs.cloudflare.com/ajax/libs/jquery/1.7.1/jquery.min.js" type="text/javascript"
language="javascript"></script><script src="//webinarjam.net/webinar/regpopup/js/porthole.min.js"
type="text/javascript" language="javascript"></script><script
src="//webinarjam.net/webinar/regpopup/regpopbox.js" type="text/javascript" language="javascript"></script>
</div>
<strong>This Webinar-Based Show is held every week on Thursday evening, from:</strong>
<strong>7:00 PM - 8:00 PM EDT</strong>
<h2><b>Register for the FREE LIVE Weekly Episodes by clicking the link below</b></h2>
&nbsp;
<div class="embedded-joinwebinar-button"><a title="regpopbox_12501_debf4bf5d4" href="#" target="_parent"></a></div>

```

If you'd like the button to appear more than once on your page, then all you want is the first part of your code:

To Insert a second button you need just the first lines of code `<div class= ..... to </div>`

## Test the page

Your page will look similar to this

1. This button when clicked will pop open the registration form
2. This second button will send your registrants back up to the top button where they can register
3. Go ahead and register to confirm the process works.
